The Top Left Panel (Red Box) is where the booking detail will be shown.

The Bottom Left Panel (Yellow Box) is where the menu located to book a flight.

The Right Panel (Green Box) is where the menu (PNR Action, Quick Entry, Search and Queues) located and the area to input the booking detail.

## VARS FEATURES – PNR

### PNR ACTIONS

The screenshot shows a software interface for PNR (Passenger Name Record) actions. It features a top navigation bar with 'PNR Actions', 'Quick Entry', 'Search', and 'Queues'. The main area is divided into several functional groups:
 

- Record Locator:** A text input field with an 'Open' button below it, and an 'Open PNR' button at the bottom left.
- Actions:** A group of buttons including 'Display PNR' (with a star icon), 'Ignore' (with a cross icon), and 'Ignore \*R' (with a cross icon).
- Save Commands:** A group of buttons including 'Save' (with a floppy disk icon), 'and Display' (with a star icon), and 'and Issue Tkts' (with a ticket icon).
- Email:** A group of buttons including 'Itin-Receipt' (with an envelope icon), 'Confirmation' (with a checkmark icon), and 'E-ticket(s)' (with a ticket icon).
- Other:** A group of buttons including 'Divide PNR' (with a split icon) and 'Queue PNR' (with a queue icon).

#### Details:

| Open PNR              |                                                                                               |
|-----------------------|-----------------------------------------------------------------------------------------------|
| <b>Record Locator</b> | Put reservation code (RLOC) and Click Open Button to retrieve a booking.                      |
| Actions               |                                                                                               |
| <b>Display PNR</b>    | Display reservation.                                                                          |
| <b>Ignore</b>         | Ignore PNR and clear the screen.                                                              |
| <b>Ignore *R</b>      | Ignore action and re-display reservation.                                                     |
| Save Commands         |                                                                                               |
| <b>Save</b>           | Save the booking.                                                                             |
| <b>and Display</b>    | Save the booking and re-display reservation.                                                  |
| <b>and Issue Tkts</b> | Save the booking and issue the ticket.                                                        |
| Email                 |                                                                                               |
| <b>Itin-Receipt</b>   | Emails receipt to email address in the PNR.                                                   |
| <b>Confirmation</b>   | Brings up a pop up screen showing confirmation.                                               |
| <b>E-tickets</b>      | Opens up another pop up box that gives you the option to print confirmation or email tickets. |
| Other                 |                                                                                               |
| <b>Divide PNR</b>     | Divide a passenger off from PNR and create a new PNR for the passenger.                       |
| <b>Queue PNR</b>      | Send PNR to queue.                                                                            |

## QUEUES

This area is used for management and storage of PNR's. Each sales office has set of numbered queues – up to 1000. The queues usually contain Flight confirmations, Waitlist clearance and Schedule change. They can also be used for example to store PNR's that are ready for ticketing. Queue can also be used for managing Flight time and Flight Number changes, cancelled Flights, move passengers from one Flight to another and other Flight time changes.

Click the View Queue Button first then select the Queue from the drop-down menu on the pop up queue.

After you select the Queue, the Queue menus will opened, and Queue City, Queue No, and Items Left will entered automatically.

## Details:

| Queue Actions         |                                                                                                                                                                                                                                                                                |
|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>View Queues</b>    | This button will bring up a list of available queues that you can choose from the system.<br><b>Please Note:</b> For any agents which do not have 'Authorized for all queues' in their sine code, they will only have access to the queue assigned to their Issue Office Code. |
| <b>Remove PNR's</b>   | Remove all bookings off the current queue you are viewing.                                                                                                                                                                                                                     |
| <b>Sign Off Queue</b> | Sign user off current queues.                                                                                                                                                                                                                                                  |
| Actions               |                                                                                                                                                                                                                                                                                |
| <b>Display PNR</b>    | Once you have a queue open, the PNR will display in easy view PNR section below the PNR tabs. Click on Display PNR to view the PNR in command line format on the Top Left Panel.                                                                                               |
| <b>Next</b>           | Move to the next PNR on the Queue. If you have not done Save on the PNR you are currently viewing then the PNR will remain on the queue.                                                                                                                                       |
| <b>Ignore *R</b>      | Ignore and re-display the booking you are currently working on.                                                                                                                                                                                                                |

|                                                                                            |                                                                                                                                                                                                                                  |
|--------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Please Note:</b> Any Changes to Tickets/Form of Payment transactions cannot be ignored. |                                                                                                                                                                                                                                  |
| <b>Save Commands</b>                                                                       |                                                                                                                                                                                                                                  |
| <b>Save</b>                                                                                | Save the PNR. This will then remove the PNR from the queue                                                                                                                                                                       |
| <b>And Display</b>                                                                         | Save any changes and re-display PNR. This will not remove the booking.                                                                                                                                                           |
| <b>And Issue Tkts</b>                                                                      | Save and Issue E-Tickets. PNR will not be removed from the queue.                                                                                                                                                                |
| <b>Email</b>                                                                               |                                                                                                                                                                                                                                  |
| <b>Itin-Receipt</b>                                                                        | If there is a stored email address in the PNR, it will send a copy of the booking itinerary to the email address (No Tickets in booking).                                                                                        |
| <b>Confirmation</b>                                                                        | Will send copy of E-ticket receipt to email address in PNR.                                                                                                                                                                      |
| <b>E-Ticket(s)</b>                                                                         | Option to one of three items. <ol style="list-style-type: none"><li>1. Print. The Ticket will display in a new window/tab in HTML format of the E-Ticket to print.</li><li>2. Send via Email.</li><li>3. Send via SMS.</li></ol> |

- After you added the segment, go to Passengers Menu to enter the Pax name.

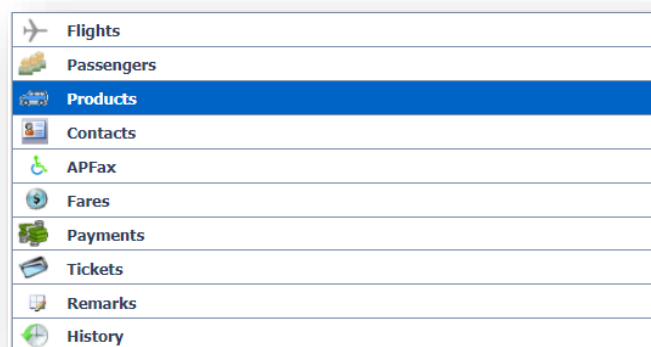

In the Right Panel you will see the Name Entry Box. Select the Number of Passengers first then select Pax Type and Title from drop-down menu and enter First Name with Surname. Then click Add To PNR Button to save the name Pax.

Name Entry for: ☒ Individual(s) ☐ Family ☐ Group Party Number of Passengers: 2 Pax

| Pax Type | Title | First name | Surname |
|----------|-------|------------|---------|
| Adult    | MR    | Bernard    | Sonata  |
| Adult    | MR    | Albert     | Sonata  |

- If you want to add Products to the Pax, you need to go to Products Menu. If you don't want to add Products, you can skip this menu then continue to the next Menu.

Select the Category, Pax and Flight Segment from the drop-down menu. Double Click on the Product Box until the Product show in the Top Left Panel.

Void all unused ticket(s) and removes ticket numbers from PNR

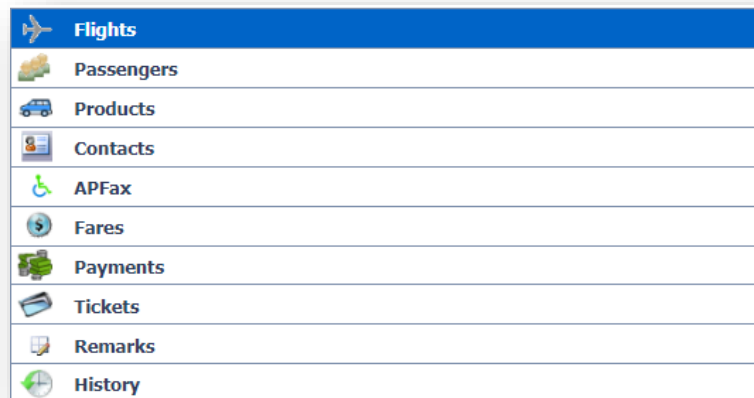

A pop up will appeared then click OK to confirm the action.

**VARs**

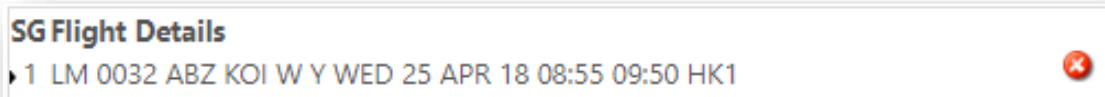

Confirm Void Ticket(s)

The E-Ticket will voided and disappeared at the Top Left Panel.

If the passenger don't want to rebook any flight, you should delete all the itinerary from the PNR. Go to Flights Menu.

Delete all the segments by clicking the X Button in the SG Flight Details.

### REFUND THE TICKET

1. Open the PNR by entering the PNR in the Record Locator Field in PNR Actions Box then Click Open.

2. Go to Tickets Menu

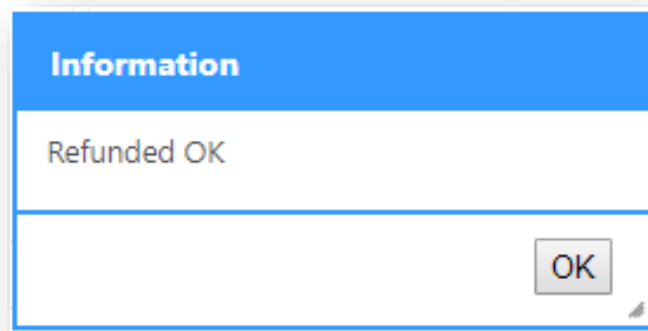

The Ticket(s) will be displayed in the Top Left Panel and another buttons are appeared in the Right Panel.

3. Click the "Refund all unused tickets" Button to do a refund.

The Information box will pop up and the ticket will be disappeared in the Top Left Panel.

The E-Ticket will refunded and disappeared at the Top Left Panel. If there are any Refund Fee, this will ticketed as an MPD ticket and the Status for this MPD is ELFT.

## RE-ISSUE THE TICKET

When a reservation change results in a higher fare than that at which the passenger is ticketed, a ticket reissuance is necessary.

1. Open the PNR by entering the PNR in the Record Locator Field in PNR Actions Box then Click Open.

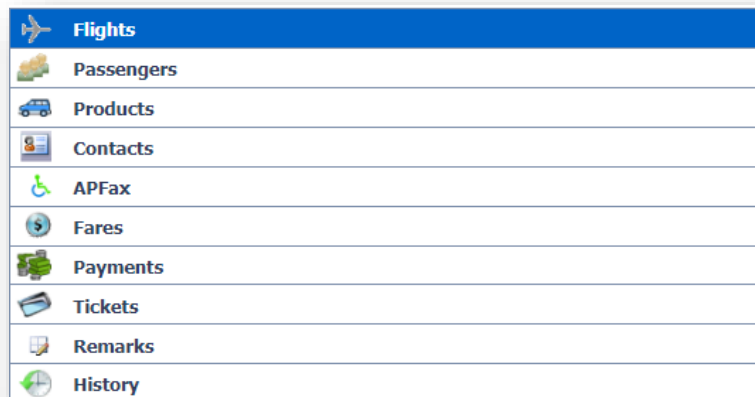

| PNR Actions                                                                                                                                     | Quick Entry                                                                                                                                               | Search                                                                                                                                                                             | Queues                                                                                                                                                                                                                                                                                                                       |

### 2. Go to Flights Menu

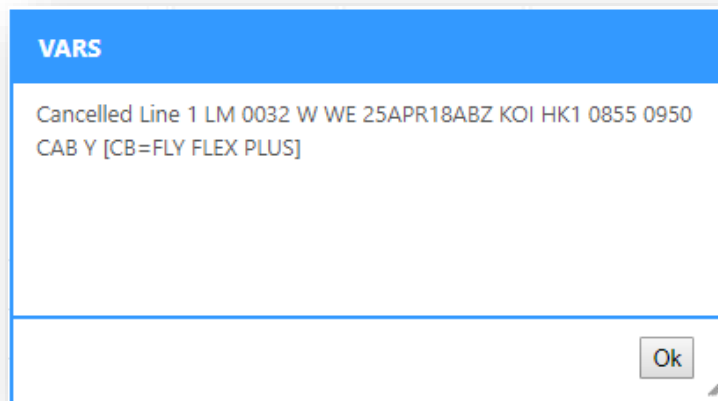

The Segment(s) will be displayed in the Top Left Panel.

### 3. Delete the segment by clicking the X Button in the SG Flight Details Box.

A pop up will appear then click OK to continue.

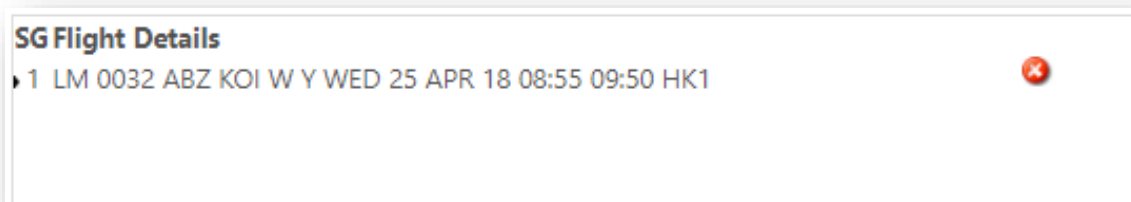

4. Search For Availability in the Search Box. Select the Departure and Destination City, Flight Date and Total Pax from the drop-down menu then click Search Button after the Status Box.

Availability Search

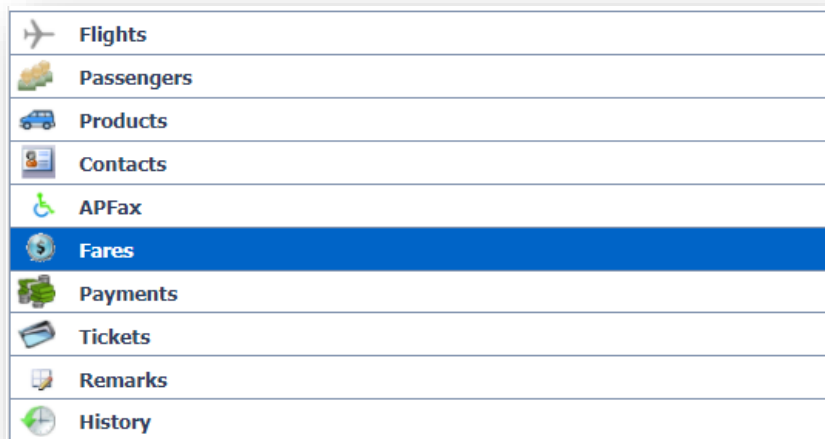

The result will displayed under the search box. Double Click the RBD Class to add the flight.

## REVALIDATE THE TICKET

When a reservation change results in the same fare/class as that at which the passenger is ticketed, a ticket revalidation is necessary.

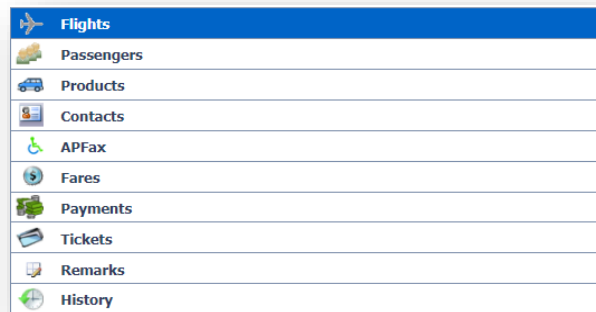

1. Open the PNR by entering the PNR in the Record Locator Field in PNR Actions Box then Click Open.

| PNR Actions                                                                                   | Quick Entry                                                                                                                     | Search                                                                                                                             | Queues                                                                                                                                                                                                                            |

### 2. Go to Flights Menu

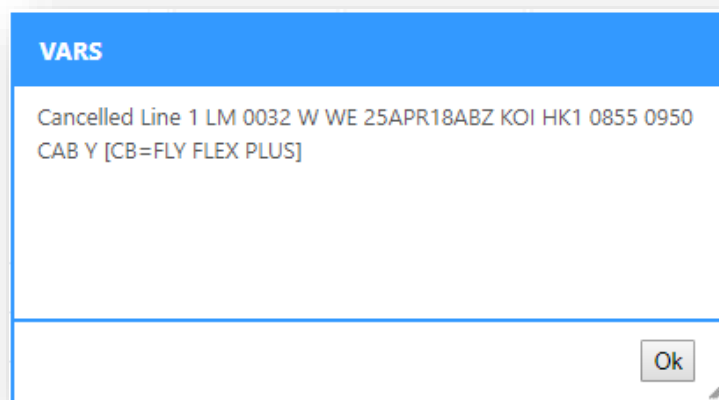

The Segment(s) will be displayed in the Top Left Panel.

### 3. Delete the segment by clicking the X Button in the SG Flight Details Box.

A pop up will appear then click OK to continue.

4. Search For Availability in the Search Box. Select the Departure and Destination City and the Flight Date from the drop-down menu then click Search Button after the Status Box.

U0 K0 M0 H0 Z0 L0 Q0 E0 G0 N0 X0 A0
    
```

**The above inventory line response (top line) means:**

**AV** (availability line number), **Day of The Week**, **Date of Requested Availability**, **Departure and Arrival Dates and Times**, **Flight Number**, **EQP** (equipment / Aircraft type), and **Availability & Classes available**.

**The lines below will show a maximum of 6 available routes and dates available from the date you have chosen. Please note: if you have chosen 25<sup>th</sup> April and the 25<sup>th</sup> April is not available, the system will bring back the nearest available date for those city pairs. Once a **booking class is full**, all flights have been booked the **availability of the class will show at 0**.**

## BUILDING A PASSENGER NAME RECORD (PNR)

There are four fields needed to build a PNR:

1. Itinerary
2. Passenger Name / Names
3. Phone Number
4. Ticket Time Limit information

A booking file must contain the names of all passengers for whom you are making a reservation. **You must include infant names even if they do not occupy a seat.** An infant is usually defined as a passenger that has not yet reached their 2<sup>nd</sup> birthday.

|                                                           |                                      |
|-----------------------------------------------------------|--------------------------------------|
| 1 Passenger                                               | -1DOE/ROBERTMR                       |

| Email Address                                               | 9E*NAME@HOTMAIL.COM                        |
| Cancel contact number 2                                     | 9x2                                        |
| Delete Name item 1                                          | -1@ (Cancel name)                          |
| Change name Pax 2 in item 1                                 | -1@2 (1.2DOE/JONMR/ANNMRS-delete pax 2)    |

When making a group booking and passenger names are not known, they can be held as a group by the following:

-15STUDIO/GROUP\*

You can **hold the seats under a block of names** and the correct number of seats on hold. You will not be able to issue any tickets until you have the correct number of passenger names assigned to that group.

When you **delete a passenger name**, please remember **any FAX against that passenger will be deleted**. If you put the name back in on the reservation, you will need to out any passenger related remarks back into the PNR.

|                                                               |               |
|---------------------------------------------------------------|---------------|
| Time Limit Booking to Auto Cancel by 1200 Hrs on 24 September | 8C/1200/24SEP |
|---------------------------------------------------------------|---------------|

|                               |          |

## PASSENGER SERVICING INFORMATION

A service request that requires an action by the airline defined as an SSR (Special Service Request). The airline needs to be aware of the passenger's requirements in advance of the travel to make the arrangements. In VARS EXPERT, these are known as APFAX (Airport Facts). These include Wheelchair requests, seat or meal requests, etc. **These will eventually end up on the PNL (Passenger Name List).**

|                                           |                                   |
|-------------------------------------------|-----------------------------------|
| Wheelchair request pax 2 in PNR           | 4-2FWCHR                          |
| Special Meal request pax 1 segments 1 & 2 | 4-1S1FVGML / 4-1S2FVGML           |
| Check In APFAX                            | 4-1S1FCKIN ALLOW ACCESS TO LOUNGE |
| To delete APFAX line no.4                 | 4X4                               |

## DCS TRAINING

To add passport details so they show on the passenger name list (PNL) for passenger 1.

4-1FDOCS/P/GB/54211245/GB/14MAR78/  
M/19JUL20/JONES/ALFRED/BELFORD  
(4-1FDOCS/P=Passport/Country of Issue/Passport  
Number/Nationality/Date Of Birth/Gender, M =  
Male, F = Female/Passport Expiry/Surname/First  
Name/Middle  
if any

To add Visa details required for travel for passenger 2.

4-2FDOCO//V/9891555/LONDON/  
14MAR06/USA  
(Visa Number, Place of Issue, Date of Issue,  
Country Visa Applies)

If Visa is not applicable to this journey type for passenger 1

4-1FDOCO//V/NA

To add E-Voucher to PNR.

4-1FDiscount50%  
(4-1FDISCVoucherCode)

## ADDING REMARKS

**Comments relevant to the PNR can be added with the following entries:**

### **5\*\*followed by freeflow text**

This will be followed by the Agent City Code,  
Agent Sine Code and the Date the remark was left.

### **5\*followed by freeflow text**

This will do the same as the above,  
without the Agent Details.  
These will however show in the History of the PNR.

To remove a remark, enter 5x followed by the line number.  
E.g. remove remark line 3

**5x3.**

## DIVIDING A PNR

Reservations for more than one passenger are often made in the same PNR it may happen that one or more of the passengers will need to make a change to their reservation.

It is not possible to make the changes for different flights in the PNR when other passengers are still on the old flight. They would need to be divided from the booking.

Divide passenger 2 from PNR  
File the new PNR  
Confirm final changes

D2/  
E and enter  
E and enter.

At this stage a new record locator will be displayed. The original record locator of the booking will remain with the first PNR. **The divide must happen first before any changes are made to the PNR.**

Multiple passenger dividing

D2/4/5 followed by E enter, E enter

### GENERAL FAX (GFAF)

General fax are another form of communication for airline staff, where you can leave a general passenger related remark that is important but does not need any action to be taken.

Passenger 1 VIP

3-1FVIP CEO Computer co

Delete General fax, line 1.

3x1

### FARE QUOTE AND FARE STORE

Before any tickets can be issued a valid fare must be stored in the PNR. The auto fare quote is designed to **return a list of possible fares** that matches all the criteria of the passengers journey.

Fare Quote for all HK segment

FG

Fare Store line 1 of FG display

FS1

Delete Stored Fare

FX

Display fare rules applicable to  
Current PNR

FN

Display Fare rules for fare quote  
Line 1 of current PNR

FN\*1

Display fare rules applicable to fare 19

FN19

When you apply FG, if you have more than 1 passenger in the PNR (including child and infants) initially you will only see the fare for one passenger. **However when you store the fare, the fare will then show for all the passengers with a grand total at the bottom of the fare quote.**

### MANUAL FARE QUOTES (SECURITY LEVEL AGENTS)

To manually put a fare into a booking with fare and tax, this maybe used in case of emergency or special promotion.

Fare quote 1 adult at a 0.00 fare  
(Free ticket) one way.  
and

FQMUSD0.00 Y/0.00+0.00  
(Fare quote manual, currency, booking class. 0 fare  
0 taxes)

Fare quote 1 adult at 50.00 USD & 25.00 tax

FQMUSD75.00 Y/25.00+12.50

Return ticket.

Y/25.00+12.50

|                                                                             |               |
|-----------------------------------------------------------------------------|---------------|

### FORM OF PAYMENT (FOP)

*In order to issue a ticket, method of payment needs to be recorded on the PNR. The 4 methods of payment as below:*

|                                                                  |                                                                                                       |
|------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
| <i>Cash Payment all passengers, full<br/>Amount on PNR</i>       | <i>MM</i>                                                                                             |
| <i>FOP Cash, USD 100.00 only</i>                                 | <i>MMUSD100.00</i>                                                                                    |
| <i>Cash payment in full, by cheque</i>                           | <i>MQ</i>                                                                                             |
| <i>Cash payment for USD 125.00</i>                               | <i>MQUSD125.00</i>                                                                                    |
| <i>Invoice payment in full followed by<br/>Account reference</i> | <i>MI-ABC TOURS01012</i>                                                                              |
| <i>FOP Credit Card</i>                                           | <i>MCUSD100.00-12536/CardNumber**0908<br/>(Authorization / Card Number &amp; Expiry Date)</i>         |
| <i>FOP Credit Card (Auto Verification &amp; Payment)</i>         | <i>MKUSD100.00/CardNumber**0908&amp;123<br/>(Auto Verification &amp; Payment and Security number)</i> |
| <i>Check payment Balance due</i>                                 | <i>MB</i>                                                                                             |

*An **alternative and quicker way to take credit card payment** is through the **CC box screen**, located on the VRS screen along the bottom. This screen may be used to obtain an authorisation from the system and it will generate the MK entry above. Multiple payments can be taken on any PNR (not recommended).*

### ISSUE TICKETS / BOOKING CONFIRMATION

|                                                                       |              |
|-----------------------------------------------------------------------|--------------|
| <i>Booking confirmation receipt – without Ticket issue</i>            | <i>EZBC</i>  |
| <i>Issues e-Tickets for all passengers on the PNR and saves</i>       | <i>EZT</i>   |
| <i>Issue e-Ticket all PAX all SGMT, retain PNR in AAA</i>             | <i>EZT*R</i> |
| <i>Issue paper tickets</i>                                            | <i>EPT*R</i> |
| <i>Send Receipts by Email</i>                                         | <i>EZRE</i>  |
| <i>Displays a print friendly itinerary/receipt with ticket number</i> | <i>EZRC</i>  |
| <i>Print the Receipt for passenger 1 only</i>                         | <i>EZR1</i>  |

### VOID TICKETS

*Void /Cancel all tickets in PNR*

*EZV\*R*

*Void /Cancel all MPD ticket in PNR (this applies to any products)*

*EMV\*R*

*To Void a specific ticket in the PNR*

*\*T-ticket number/01=V  
(01 denotes ticket coupon number)*

*Set all Ticket Coupons to refunded status*

*EZV\*[R]*

*Set all Ticket Coupons to void status*

*EZV\*[V]*

*Set all Ticket Coupons to exchange status*

### PRODUCTS

*These are optional extras that you can add onto a journey such as insurance, rail, chauffer drive packages. These can be added by a simple set up in the system and sold as following:*

|                                                              |                                    |
|--------------------------------------------------------------|------------------------------------|
| <i>To enter a product into PNR for Passenger 1 Segment 1</i> | <i>7-1=1FXXXX (7-PAX=1SEG1)</i>    |
| <i>To enter a product for PAX 4 Segment 2</i>                | <i>7-4=2FXXXX</i>                  |
| <i>To delete a product from PNR</i>                          | <i>7X2 (product line number 2)</i> |
| <i>To issue MPD tickets</i>                                  | <i>EMT*R</i>                       |

***These products need to be pre-set up before they are ready to sell. To view products, visit Admin > Back Office Administration > Semi Perm > Products.***

### QUEUES

*VRS provides a **queue system** for the **management and storage** of PNR's. Each sales office has a set of numbered queues up to 1000 each sales office. The queues usually contain flight confirmations, waitlist clearance and schedule changes. They can also be used for example to store PNR's that are ready or ticketing and for passing general messages to other members of staff.*

|                                                                       |                                           |
|-----------------------------------------------------------------------|-------------------------------------------|
| <i>To bring up a list of office Queue's.</i>                          | <i>QCA</i>                                |
| <i>Place PNR on Queue LHR/045</i>                                     | <i>QEP/LHR/045</i>                        |
| <i>View Queue LHR/045</i>                                             | <i>Q/LHR/045</i>                          |
| <i>Sine off Queue Activity</i>                                        | <i>QX</i>                                 |
| <i>Display last locator, ended or ignored</i>                         | <i>QL</i>                                 |
| <i>Remove PNR from Queue</i>                                          | <i>QR</i>                                 |
| <i>Ignore changes, keep on Queue, move to next item in queue.</i>     | <i>I</i>                                  |
| <i>Save changes to PNR, remove item from Queue and view next item</i> | <i>E</i>                                  |
| <i>View details for only one city</i>                                 | <i>QEP/LON</i>                            |
| <i>Delete all PNR's off Queue LHR/045</i>                             | <i>QD/LHR/045 (use with extreme care)</i> |

#### QUEUE IMPORTANT INFORMATION

***All queues are a mandatory 3 digit number ranging from 1-999. There, for anything under 100 must be used in the correct way. Queue 10 must be used as 010. Queue 8 must be used as 008.***

### CHANGES! \*\* RE-ISSUE \*\*

When a **reservation change results in a higher fare** than that at which the passenger is ticketed, a ticket reissuance is necessary. Follow these following steps to reissue a ticket:

1. Check **new flight and book** (using Availability command).
2. Add **re-booking fee if applicable** e.g. 7-1S1FRBF1 (This should be automatic if they have been configured in the change fee set up).
3. **Remove the old flight.**
4. Add new fare quote (**FG** then **FS1**).
5. Check **MB** – (this tells the balance required which should be the rebooking cost plus fare difference).
6. Void the old ticket with **EZV\*R** command.
7. **Take payment** for the change fee and fare increase.
8. Re-issue the ticket with **EZT\*R** command.
9. Automated MPD for the rebooking fee is issued in addition to the new ticket.

### CHANGES! \*\* REVALIDATION \*\*

When a **reservation change results in the same fare** as that at which the passenger is ticketed, a ticket revalidation is necessary. Follow these following steps to revalidation a ticket:

1. Check **new flight and book** (using Availability command).
2. Add **re-booking fee if applicable** e.g. 7-1S1FRBF1 (This should be automatic if they have been configured in the change fee set up).
3. **Remove the old flight.**
4. Add new fare quote (**FG** then **FS1-R**).
5. Check **MB** – (this tells the balance required which should be the cost of rebooking only).
6. **Take payment** for the rebooking fee.
7. Revalidate the old ticket with **REZT\*R**.

The Change Fee will be issue automatically when the ticket is revalidate.

### REFUNDS (WITHOUT MPD PRODUCTS)

To **refund a booking** the following steps need to be followed:

1. IF AUTO REFUND FEE IF APPLICABLE FCR1 or FCR2
